

Green Calgary's Scent-Free Policy

Policy:

Due to the health concerns arising from exposure to artificially scented products, Green Calgary has instituted this policy to provide a scent-free environment for all employees, volunteers, and visitors.

Definitions:

The use of artificially scented products will not be permitted within the building at any time. In addition, all materials used for cleaning within the building will be scentfree or naturally scented with 100% pure essential oils only.

For information on locally available scent-free products please speak with one of the employees in the EcoStore.

Procedure:

Employees will be informed of this policy through signs posted in buildings, the policy and procedure manual, and will receive orientation and training at the staff meeting scheduled for July 28, 2009.

Visitors will be informed of this policy through signage and it will be explained to them by their host.

This policy is effective as of 2009-08-01.
