

Create your own climate art in the style of Jill Pelto

Jill Pelto is an environmental artist. She combines scientific data and art to create amazing works of art which tell a story. You can watch her video on our website to learn more about how she creates works of art: <https://www.greencalgary.org/green-kids/online-activities>

Suitable for ages: Grades 5-12

Instructions

What you will need checklist:

- Materials of your choice to create your work of art (pens, paints, pencils – it's up to you!)
- Data for an issue of your choosing (e.g. population of caribou over time, global temperatures, population of Calgary).

Instructions:

1. Choose a topic - what story do you want to communicate?
2. Search for data. For example, if you are researching the growth of Calgary, you might look for the population of Calgary over time.
3. Plan how to share your story. Try creating a graph to display your data and think about how you can incorporate this into your work of art.
4. Watch Jill Pelto's video on our website for more ideas: <https://www.greencalgary.org/green-kids/online-activities>
5. Check out Jill Pelto's work for inspiration: <http://www.jillpelto.com/>

Did you know?

The City of Calgary has a plan to mitigate the impacts of Climate Change in our city. You can read the full plan on [their website!](#)

Share with us!

We would love to see photos of your low-waste crafts and activities at home. Feel free to tag us or hashtag #GreenCalgary in your social media posts! Find us here:

“Dwindling Migration uses data that documents the dramatic decline in caribou population herds, focusing on the George River Caribou Herd from 1980-present. Unfortunately, this trend is seen in most caribou herds globally.”
